Drive to develop

Hello!

We'd like to introduce you to some features that can help you learn better.

Downloading a test case

Once every 24 hours, you can download a test case to study to see where your solution fails. We don't give access to all tests because we want to avoid test-driven development. Instead, we want to motivate you to come up with more abstract solutions.

The problem of the day

Every day you'll be given a new challenge from one of the topics you've already learned. This will allow you to keep practicing your skills and check if you've really understood the concepts.

[Keep learning](#)

Solve like professional

Code like a professional

Start developing like a pro with an integrated development environment (IDE) from JetBrains. This will make it easier for you to debug your code, and get really effective at writing code with all the smart code analysis features. There's a link to a suitable IDE in every coding challenge at JetBrains Academy.

Help us to be better

If you have any feedback you'd like to share with our team, or would be willing to have a short call, just answer this email. In return, you'll get a month of free code reviews for your project stages from our mentors.

Keep learning

Happy learning,
JetBrains Academy Team
